

# KEYKIP

## GPS TRACKER

The Keykip was designed to be smart and powerful, yet simple to use. A device that not only allows you to track the device in many countries around the globe but assisting the user to find their Keys, or other items its placed into.

The audible sounder inside the Keykip can be easily activated via the APP, allowing you to close in on those important assets.

Design and robustness are something that was carefully considered, resulting in a product that really looks like a keyring, with no additional buttons.

## So how does the Keykip work

Once the customer downloads the Keykip APP, there are only a few things to complete:

- Select a username and password
- Scan the IMEI on the box
- Name the Keykip

Simplicity at its best. The Keykip will then show its location and there are some great features that can be enjoyed by the user.

The Keykip will send its location to our cloud service every two minutes whilst in motion, when it does not move, the Keykip will sleep.

The battery life can last up to 7 days plus, this depends on how much the Keykip moves, but in most cases, you can expect around 7 days battery life. This is achieved by only allowing the Keykip to transmit data every two minutes whilst in motion.

“ Battery Life is Remarkable for such a small device ”

“ The KeyKip audible sounder is amazing, it really helps you to locate your items ”

## Using the Keykip app is an exciting experience and simple to use

Lots of energy was placed on making the APP simple yet allowing the user to trigger some pretty powerful features.

The experience needs to be enjoyable and we feel we have accomplished this; we have also left room for future updates and further features.

### Other Great Features on the Keykip APP:

- **Activate Sounder**
- **Instant Geofence**
- **Motion Detection**
- **Emergency Tracking**

**Activate sounder** allows the user to switch on the internal sounder. This will automatically switch off, after 60 seconds.

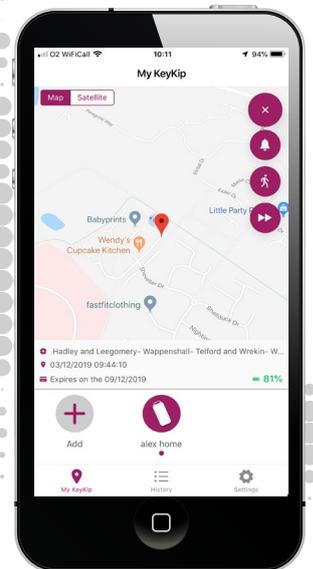

**Instant Geofence** allows the user to instantly place a 200-meter boundary around the Keykip and be informed when it leaves and arrives within this boundary.

**Motion detection** inform the customer when the Keykip is pick up.

**Emergency tracking** was placed on the app for those times when you need the Keykip to send its location every few seconds. It will automatically change to its default mode after 60 seconds.

### Multiple Keykips in your account

We know there are many that might want to enjoy more then one Keykip in their account, press the add icon on the app and scan the box and call it a name, mission complete. It really is that simple.

## Summary about a great innovative solution that we want you to enjoy

The Keykip was designed and thought about, a solution that many will enjoy and find those handy times that such a requirement is required.

Its neat and it works. Type C waterproof charging port and plenty of room on the bezel so your keys can move freely.

A well designed APP that makes it a pleasure to use. A cost affective tracking solution that many people can afford.

# Welcome to the new Keykip
