

## CCTV Rapid Deployment kit with PTZ camera

When situations require covert camera systems yet require high quality and the ability to control the cameras remotely, then this is a solution that will satisfy many operators. All you have to do is switch on the case, plug your camera and the kit is ready.

**Tough and rugged, yet simple and fast to deploy.**

- **Self-Contained and Easy to Deploy**
- **Speed and simplicity of deployments is the key. The above system will completely satisfy these criteria.**
- **All cables are made to Military standards, extending cable length for the cameras from the case is so simple with robust extended click and go connectors.**
- **Depending on the type of camera you wish to connect, battery life can last up to 7 days. Using powerful PTZ types cameras will decrease the battery life.**

### THE KIT CONTAINS

- 1 x Rugged IP67 Peli™ Case containing :
  - 1 x 205Ah Lithium-ion battery
  - 1 x 4G/LTE Router (with 1 x WiFi antenna and 1 x GSM antenna)
  - 1 x Penta Band GSM antenna with 4M cable
  - 1 x NVR
  - 1 x 1Tb SSD
  - 2 x Camera port
  - 1 x Power connector
  - 1 x Voltmetre
  - 1 year unlimited tracking ability
- 1 x PTZ Star Vision 5.1MP x36 optical zoom camera – Black color
- 1 x Transport case for PTZ camera
- 1 x Multi-network SIM card – EU coverage with 100Gb of data valid for 6 months
- 1 x 5 metres cable between the case and the camera
- 1 x 10A – 12.6V charger for the case

## GPS Tracking ability

### Remote management of the kit

The CCTV Rapid Deployment kit includes a GPS Tracker. The GPS tracker allows you to be informed if the case is picked up or exit a certain geo-fence in real-time. This also gives you the ability to remotely turn on/off your case and check the battery voltage. The mobile app and the GPS tracking platform available on the PC give you access to the device information at any time from anywhere.

**GEOFENCING**

**INSTANT  
NOTIFICATIONS**

## Remote secure access

Our priority is to make sure your data is kept securely. To do so, all the recorded videos are locally stored inside the 1Tb SSD of the case and will not be hosted on any server or any cloud service. This mechanism also reduces the data consumption of the multi-network SIM card because your videos are not constantly uploaded on a server.

You are free to use the smartphone app or PC web platform to access your footage live or consult the playback. You will be able to decide which subdomain you want to create in order to access the web platform, we will setup everything with you.

Our multi-network data SIM cards with EU coverage operate in a VPN and can't be accessed from the public internet. Only our Virtual Private Server can create the link between you and your CCTV Rapid Deployment kit via the IPsec protocol.

**More secure, more reliable.**
